TASK 1C

WORK ORDER 9REVISION OF MANUAL OF MOLDED INCENDIARIES

A short technical addition was written covering the work performed under RD 88, Task Order 1. Specifically, this revision deals with the new configurations of the inhibited material. A copy of the entire manual written on plain bond paper was prepared along with the new addition. Two hundred and twenty five samples each of three types of aluminum powder were sealed in small plastic envelopes and an equal number of sample pieces of wire mesh were cut. These will be shipped early in July.
